

FOSDEM 2017

HPC, Big Data, and Data Science

Devroom

February 4th, 2017 - Brussels, Belgium

The 2nd edition of the HPC, Big Data and Data Science devroom will be co-located with FOSDEM 2017. FOSDEM is an annual conference about free and open source software, attended by over 5000 developers and open-source enthusiasts from all over the world. The

1st edition of the devroom was a terrific success with plenty of interesting talks and follow up discussions.

Participate!

Our goal is to bring the communities together, share expertise, learn how we can benefit from each other's work and foster further joint research and collaboration. We welcome talks about Free and Open Source solutions to the challenges presented by large scale computing, data management and data analysis.

Dates

- **Call for participation closes: Friday, December 2, 2016**
- Devroom schedule available: December 16, 2016
